16 SOUTH MARKET ST BOSTON MASS

IMPORTANT

Owing to the unusual market conditions all prices are subject to change without notice.

WE have omitted all the illustrations from this catalogue this year, not wishing to feature any varieties until we are absolutely sure of receiving them.

At the time of going to press we are somewhat in doubt as to what the delivery of Bulbs will be, although we feel confident we will have a full supply of both Holland and French Bulbs.

 This is a catalogue of **Bulbs only**. For **Seeds, Tools, Plants, Shrubs, Insecticides, Fertilizers** and **Sundries** see our General Catalogue issued in January and mailed to all our regular customers as soon as issued. We will also be pleased to mail it to anyone interested upon reception of request.

Our Bulbs are of the very highest quality, selected specially for us by the best growers in the several countries where they are produced. No better are sold in this country.

Remittances may be made at our risk by draft, money order, American Express Company's money order, cash by express, or registered letter. Postage stamps may be sent for small amounts.

Address, etc.—Purchasers will please be particular in **plainly** signing their **Name, Post-office, County and State**, and mention mode of conveyance, whether by **Parcel Post, Express, or Freight**.

Parcel Post.—All bulbs sent postpaid, in 1st, 2d and 3d zones, at single and dozen prices as quoted. On larger quantities the buyer pays transportation charges. See Parcel-Post rates below.

Non-Warranty.—The Thos. J. Grey Co. give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs or plants they send out, and will not be in any way responsible for the crop. If the purchaser does not accept the goods upon these terms, they are at once to be returned.

HYACINTHS

Culture in Pots or Pans. These may be planted any time from September to November, though early planting as a rule gives the best results. Firm, heavy bulbs should be selected, and, if to be planted singly, use a 5-inch pot or four bulbs of one variety to an 8-inch seed pan. A piece of broken pot placed over the hole and 1 or 2 inches of Sphagnum Moss placed on this, make excellent drainage. A light, rich soil is essential; one made up of one-third rotted cow-manure, one-third rotted sod, and the balance of leaf-mold and sharp sand, is excellent. When planting, break off all offsets if any at the base of the bulb, and have the top of the bulb just below the soil, and the soil about an inch below the top of the pot; give a good watering, put in a cool place and cover with 5 or 6 inches of sand or sifted coal ashes; this prevents the bulbs from rising while they are making roots and holds the moisture. After eight weeks the roots should be strong enough to allow them to be brought to the light and into the room where they are to bloom.

Culture in the Open Garden. Bulbs may be planted from September until the ground closes, although the best results will be obtained if planted before the end of October. Plant 6 inches deep and 6 inches apart in soil which has been dug at least 12 inches deep and well enriched with well-rotted cow-manure. Before the ground freezes deep enough to reach the bulbs, cover with leaves or other good litter, 6 to 8 inches deep, to protect the bulbs from freezing and thawing through the Winter, thus being assured of larger and stronger spikes of bloom. The covering should be removed early in the Spring.

SPECIAL NAMED BEDDING AND FORCING HYACINTHS

These are large, solid bulbs of distinct and decided shades, producing large spikes of flowers, and all blooming at the same time, which makes them of great value for bedding out, as one can obtain the exact color effect desired. They are also desirable for forcing in pots or pans.

TULIPS

Universal favorites, and the most popular and attractive flowers for early Spring display in the garden or for Winter blooming in the house or conservatory. They are perfectly hardy and of easiest culture in any good garden soil, seldom failing to give the greatest satisfaction. When massed in beds or large clumps, the best effect is obtained. Double and Single sorts, when planted together in clumps among the shrubs or perennials, give a longer season of bloom than if either were planted alone. For best effect, when planted in small clumps, the bulbs should be set 4 inches deep and 4 inches apart, but in large beds or borders a distance of 5 or 6 inches between the bulbs can be allowed.

NAMED DOUBLE TULIPS

These are useful for bedding and forcing; the large, Peony-like blossoms are highly ornamental, coming into bloom about a week or more after the single early sorts, and lasting considerably longer in flower. They make the best display, and the effect is better when planted one variety in a bed or clump. The letter after the name indicates the time of blooming; those marked A bloom together, followed in about a week by B, and C, the latest.

DARWIN TULIPS

SINGLE LATE-FLOWERING

A distinct race of Single Late Tulips with immense flowers, of well-rounded form, on tall, thick stems from 2 to 3 feet in height. This, with their very brilliant colors, ranging from almost pure white through all the shades of pink and purple to the most intense red, makes them unsurpassed for planting out or for cutting. A bed of these tall Darwins, with an undergrowth of Myosotis, Daisies, etc., is a most beautiful sight; planted among the shrubbery, they give life and color to the garden. The varieties we offer are selected from a very large collection as the best and most distinct, containing none but the large-flowering sorts. Forcing sorts marked with an asterisk (*).

NARCISSI, or DAFFODILS

Among the most beautiful and fragrant of our hardy Spring-flowering bulbs the Narcissi enjoy great popularity and occupy a very prominent place in the world of flowers, doing well in almost all soils and situations, for naturalizing among the grass, planting among the shrubbery, on the borders of ponds and streams, and in formal beds. For house or greenhouse culture they are equally desirable, planted in pots or bulb pans, several bulbs of one variety in each, and treated as recommended for Hyacinths.

Selected bulbs only are offered and mostly Double-Nosed

CROCUS, GIANT FLOWERING

One of our earliest Spring flowers. Beautiful and a universal favorite. A bed, border or some clumps of these are essential to make the flower garden complete. To be had in the highest perfection, they should be planted 3 inches deep, in a deep, rich, sandy loam, and in a sunny location, though they will succeed in almost any soil or situation. When planted in connection with *Chionodoxa*, *Snowdrops* or *Scilla* they are very effective. They also may be grown indoors in bulb pans, etc., as recommended for *Hyacinths*. **Best results outside are obtained from early planting.**

LILIES FOR FORCING

Bulbs should be potted in a rich soil, using 3½ to 6-inch pots, according to the size of the bulb, and the pots plunged in a coldframe, or kept in a cool place, to get a strong root-growth. When well rooted and started 6 or 8 inches they should be shifted into larger pots to bloom, setting the bulb considerably deeper. A suitable compost is equal parts of turfy loam, leaf-mold, rotted cow-manure and sand. Bulbs should be potted as soon as received.

LILIUM candidum (Madonna Lily)

Mammoth Northern-Grown. These are of the large-flowered, pure white, thick-petaled variety, and grown for us in the north of France. Excellent for forcing and superior as a garden Lily. LILIES FOR OPEN GROUND

The Lily is without a rival among bulbous plants for beauty, stateliness and variety of coloring, while many sorts are delightfully fragrant. With few exceptions they prefer a light, well-drained, loamy soil and partial shade. Deep planting is recommended, from 6 to 12 or more inches, according to variety, and a covering of leaves or some litter to prevent the frost reaching the bulbs, as it is absolutely necessary for their success that the bulb be protected from freezing and thawing. Some varieties are ready in August, and others not before October or November, and to insure the planting of the late arrivals the place should be covered to keep the frost out.

LILY OF THE VALLEY

(Convallaria)

A great favorite with every one, and the most useful and charming of our Spring-flowering plants. The pure white, delicately scented, bell-shaped blossoms are very useful for cutting, and always in great demand. When planted outdoors, a partially shaded situation suits them best.

Grey's Perfect Forcing Pips. The finest grade of pips that come to this country and especially selected for our large private trade, which demands only the best, for forcing throughout the year. We carry these in cold storage and can furnish them at any time. Three to four weeks are usually allowed for forcing cold-storage pips into flower. \$3.75 per 100; per case of 250, \$8.50; per case of 500, \$16.00; per case of 1000, \$30.00.

Grey's Perfect Planting Pips. These are of the same excellent quality as our forcing pips, and are without an equal for outdoor planting, producing strong spikes with 10 to 15 extra-large, pure white bells. Ready December 1. \$3.00 per 100, \$25.00 per 1000.

Planting Clumps. This is the Dutch Valley, each clump containing many flowering pips and excellent for outdoor planting. 30 cts. each, \$3.00 per doz., \$22.00 per 100.

MONTBRETIA

Very desirable, gracefully branched, hardy border plants for Summer flowering, and are becoming more popular every season. The brilliantly colored Gladiolus-like flowers are borne on long, graceful spikes in the greatest profusion, and are excellent for cutting and general decorative purposes. They grow about 2 feet high, and bulbs should be planted 5 inches deep and well mulched to protect them during Winter. Ready for delivery after January 1.

Grand Duchess. Of dwarf, sturdy habit, with large flowers in the greatest profusion on strong stems, well above the foliage, from November until June. Excellent pot plant. In three colors. Lavender, Pink and Pure White.....	.25	1.50

ORNITHOGALUM (Star of Bethlehem)

Arabicum. A handsome, showy variety, with large heads of pure white, star-shaped flowers with black center, having a sweet, aromatic odor, borne on stems about 18 inches high. Excellent for forcing and growing in pots or pans. 40 cts. per doz., \$2.50 per 100, \$18.00 per 1000.

Umbellatum. Hardy variety, with clusters of white, star-shaped flowers. Excellent for borders or naturalizing. 15 cts. per doz., \$1.00 per 100, \$8.00 per 1000.

PEONIES (Pæonia Chinensis)

These have become indispensable in every garden. They are all hardy, and admirably adapted to our Northern climate, growing in almost all situations, many of them being quite fragrant, increasing in bloom each season; a good, rich, deep soil and a liberal supply of water during their growing season being sufficient to give abundance of bloom. Ready for delivery in September. The following choice sorts are from a very large collection and sure to give the best results.

50 cts. each, \$5.00 per doz.

Baron Rothschild. Outside rose, center salmon; fragrant.
Blushing Bride. Light pink.

Paint Your Greenhouse With TUNLIN PAINT

You Will Never Regret It

What the manufacturers of Tunlin Paint state, in reference to their paint for Green House work is from information given them by their various customers, and we quote below from numerous testimonials which their customers have sent them. Our white paint for the inside and outside of Green Houses, will penetrate the surface coated and will prevent the moisture from getting under the paint. For this reason, on the inside, it will remain white and hard indefinitely, not only on the woodwork, but also on iron posts and perlines. On the outside, it will wear equally well. Gutters given three coats of paint will prove satisfactory in every way.

TUNLIN PAINT COMPANY

Gentlemen:

I am well pleased with the Tunlin Paint. We had a thorough try out last March. We had a severe hail storm which broke out all of the window lights, even killing the rabbits on the prairie. This hail knocked the paint off the buildings except the ones painted with your paint. The Insurance adjuster refused to allow any claim on the buildings painted with your Tunlin Paint. I think it is a splendid paint and for this climate as it has stood up well, much better than other paints put on at the same time.

Respectfully yours,

F. H. McFarland

Dear Sir:

In reply to yours of recent date would say that your paint has given me the best results of any white paint I have ever used.

It is the only paint I have used that after one years wear still shows white. all other paints I have used have lost their color after one years wear.

I don't believe you could find a harder place to test paint than here at the Seashore with the damp salt sea air.

Yours respectfully,

Charles L. Fischer

Mr. C. L. Peterson,

Dear Sir:

It affords us great pleasure to report that the paint you furnished us several years ago is as good as the day it was put on. It seems to get harder all the time and does not allow the water getting under the paint.

We surely will use no other.

Very truly yours,

Lansdale Mushroom Company
